

# Performance analysis: what happened

A clear view of performance changes, what drove them, and which audience moved.

## Performance overview

REVENUE

382.4k EGP

Previous: 353.8k EGP

+8%

SPEND

59.4k EGP

Previous: 64.1k EGP

-7%

ROAS

6.44x

Previous: 5.52x

(5.52x → 6.44x) +17%

✓

This is real performance, not budget. Spend moved -7% but ROAS went 5.52x to 6.44x, and that is worth 54.7k EGP of the move.

## Detailed metrics matrix

every number, and what it was in the previous period

was 10.0%

-8%

## Revenue growth attribution

these two add to the revenue change exactly. there is no third thing

### Revenue +28.6k EGP

(change from the previous period)

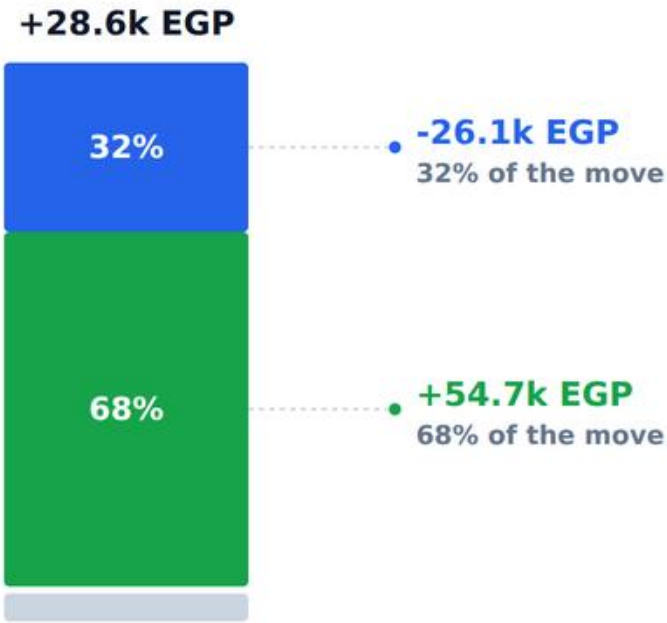

- Budget impact

-26.1k EGP | 32% of move

Spend: 64.1k → 59.4k (-7%)
- Account performance impact

+54.7k EGP | 68% of move

ROAS: 5.52x → 6.44x (+17%)

★ The move is mostly the ACCOUNT. This is real performance, not money.

## Audience segments

spend and attributed revenue vs the previous period

☑

The criteria · this is the whole rulebook

☑

SCALE

• ROAS above the account

• CPP below the account

• frequency under 2.5

• at least 5 purchases

• spend over 1,500

☑

HEADROOM

• ROAS above the account

• frequency under 2.0

• CPP stable or better

• no decline in the last 7 days

☑

SATURATED

• frequency over 4.0

• outbound CTR falling

• CPM rising

• CPP rising

☑

CUT

• ROAS below 60% of the account

• CPP above the account

• at least 5 purchases of evidence

An ad must pass EVERY line of a label to get it. SATURATED needs 3 of 4 plus frequency over 4.0. CATALOGUE and DPA are never counted as creative winners.

📅

Daily memo. Yesterday vs the day before. One day is noisy, treat it as a signal, not a verdict.

👤

Audience is Meta's own breakdown by audience segment.

# The budget — on the ad sets

Budgets move on ad sets. Every ad set ranked against the account, above and below.

<

# The ads — keep or kill

An ad has no budget field. It gets kept, refreshed, or switched off.

| Good ads — keep them running                                                                                                                                      |            |            |          |           |          |           |                  |                                                                                                     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|------------|----------|-----------|----------|-----------|------------------|-----------------------------------------------------------------------------------------------------|
| the big number is yesterday. the small one under it is the 7 day benchmark. the VERDICT is always a 7 day call — one day never kills an ad                        |            |            |          |           |          |           |                  |                                                                                                     |

The budget move · in EGP per day, not in percentage points

MOVE

6,099 / day

FROM

Engaged (7.59x)

TO

Existing customers (55.29x)

Existing customers earns more budget: it returns 55.29x against the account's 6.44x at frequency 2.12, so it still has room. Engaged gives 7.59x at frequency 1.34.

Expected +290.9k revenue / day at the SAME total budget.

Daily memo. Yesterday vs the day before. One day is noisy, treat it as a signal, not a verdict.

Audience is Meta's own breakdown by audience segment.

# Creative fatigue and hook rate

The week tells you if it is decaying. Today tells you if it is an anomaly. Both are on every row.

## The state of the creative

of 66 ads with real money behind them

FATIGUED

0

FATIGUING

11

BEHIND TIRING CREATIVE

7,837 EGP / day

Hook rate is 3 second views over impressions and only means anything on VIDEO. The account's video ads run at 22.6%. Catalogue and image ads show n/a.

## Every ad with real money behind it

Δ = THE WEEK: this ad's last 7 days vs the 7 before · TODAY = that same ad against its own last 7 days

Read the two together. A red weekly Δ with a NORMAL today is a real slide. A green week with a BELOW BAND today is one bad day, not a dying ad, and killing it would be a mistake.

## The five fatigue tests · this is the whole rulebook

|                               |                                                 |
|-------------------------------|-------------------------------------------------|
| 1. frequency over 3.0         | the same people are seeing it again             |
| 2. outbound CTR down over 15% | they are reacting to it less than they did      |
| 3. CPM up over 15%            | the auction is charging more to keep showing it |
| 4. hook rate down over 15%    | the first 3 seconds stopped stopping them       |
| 5. CPP up over 20%            | each purchase now costs more than it did        |

= 3 or more of the five fire and FATIGUED frequency is over 3.0, OR frequency is over 4.0 with 2 firing. SATURATED = frequency over 4.0 on its own: the same people are seeing it again whatever else is true. = 2 FATIGUING fire. FRESH = 1 or none. A catalogue ad has no hook, so only four of the five can ever fire on it.

# Creative — what to make next

How many you launched, how many won, the criteria, the winners by name, and what is burning out.

☆

## How many creatives to launch

counted on ads you actually LAUNCHED in the last 30 days

 LAUNCHED · 30D

351

Previous: new ads created in the last 30 days

 JUDGED

41

Previous: 310 still gathering data

 WINNERS

7

Previous: 7 cleared 8.03x · 5 only matched the account

 HIT RATE

17%

Previous: launch 6 to get 1 · 18 to get 3

 **THE CRITERIA, IN FULL.** An ad is **JUDGED** once it has spent at least 1,500 EGP and taken at least 5 purchases inside the 30 days. It is a **WINNER** only if its ROAS is at least 19% above the account average — the account ran 6.69x over those 30 days, so the winner bar is 8.03x. Beating the account by 1% is not a winner, it is a rounding error, and 5 ad(s) landed in exactly that gap this month. Catalogue and DPA are excluded from both sides: a product feed is not a creative you shot.

 **At a 17% hit rate you must launch 6 new creatives for the next winner and 18 for three. You launched 351 in the last 30 days.**

🎯

## The winning creatives — last 30 days, by name

cleared 8.03x (19% above the account's 6.69x) on 1,500+ spend and 5+ purchases

 **Winners are the 15 creative ads that beat the account's 5.95x over the last 7 days on at least 3 purchases. Losers are the 34 that did not. No catalogue on either side.**

📝

## The brief · give this to the editor

-  Brief 3 new videos off all products retention. It is the highest revenue ad that beats the account (15.64x vs 5.95x).
-  Winners convert 1.35% of clicks, losers 0.54%. Send the new cuts to the same landing page.
-  Change the body, the angle and the opening line. Do not re-upload the same video with a new name, Meta will treat it as the same creative and it will fatigue on the same curve.

🕒

## Creatives that are burning out — replace these first

these are the slots your new creatives are for

|                                                                                                                                                                               |                             |                             |                                          |                                             |                                         |                                          |

 **FATIGUED = 3+ of the five tests fire and frequency is over 3.0, or frequency is over 4.0 with 2 firing. SATURATED = frequency over 4.0 on its own. FATIGUING = 2 fire.**

# General observations

The account in plain sentences, with the money attached to each one.

 **General observations**

what a media buyer would say out loud after reading the rest

The move was **REAL PERFORMANCE**. Revenue +28.6k EGP: -26.1k of it is the budget you set, +54.7k is the account itself. Efficiency improved (ROAS 5.52x to 6.44x).

1 ad is **fatigued or saturated** and it is carrying 1,711 EGP a day. The worst is all products retention at frequency 7.96. Refresh the creative or the audience; more budget on a saturated ad buys repeats, not customers.

**Biggest opportunity:** lblb summer MOA one take. It returns 143.29x against the account's 5.95x at frequency 1.29. Take it from 74 to 85 a day: that is 11 more spend for about 1,591 more revenue a day.

**Biggest leak:** Tnm scaling. 3.05x against the account's 5.95x. Cutting it frees 2,536 a day; redeployed at the account rate that is +7,355 a day net.

The money is in the **wrong audience**. Existing customers returns 55.29x but only takes 4% of spend, while Engaged returns 7.59x on 51% of it. Move budget from the second to the first.

**Creative supply.** You launched 351 ads in 30 days, 41 got enough data to judge, 7 beat the account. That is a 17% hit rate, so the next winner costs about 6 launches. Anything less than that is not a creative plan.

 **Margin and LTV are unknown from ad data. Nothing above assumes them.**
