The budget — on the ad sets

Budgets move on ad sets. Every ad set ranked against the account, above and below.

The budget board, per day

ad set level, because that is where the budget field is

The figure consists of three cards with a light gray background and rounded corners. Each card has a colored header bar at the top. The first card has a green header bar with an upward arrow icon and the text 'BUDGET TO ADD'. The second card has a blue header bar with a downward arrow icon and the text 'BUDGET TO FREE'. The third card has a purple header bar with a line graph icon and the text 'ACCOUNT ROAS'. Each card displays a large, bold number in the center, followed by a smaller line of text below it. The first card shows '+1,050 / day' with 'Previous: across 4 ad sets' below it. The second card shows '-7,988 / day' with 'Previous: across 3 ad sets' below it. The third card shows '3.92x' with 'Previous: the bar every ad set is judged against' below it.

Metric	Value	Context

You cannot set a budget on an ad. Every number below is an AD SET daily budget, taken from Meta. Where the campaign is CBO the ad set has no budget field and the change is made on the campaign, named on the row.

Read the two together. A red weekly Δ with a NORMAL today is a real slide. A green week with a BELOW BAND today is one bad day, not a dying ad, and killing it would be a mistake.

The five fatigue tests · this is the whole rulebook

1. frequency over 3.0	the same people are seeing it again
2. outbound CTR down over 15%	they are reacting to it less than they did
3. CPM up over 15%	the auction is charging more to keep showing it
4. hook rate down over 15%	the first 3 seconds stopped stopping them
5. CPP up over 20%	each purchase now costs more than it did
= 3 or more of the five fire and FATIGUED frequency is over 3.0, OR frequency is over 4.0 with 2 firing. = frequency over 4.0 on its own: the same people are seeing it again whatever else is true. = 2 FATIGUING fire. = 1 or none. A catalogue ad has no hook, so only four of the five can ever fire on it.

📄

THE CRITERIA, IN FULL. An ad is JUDGED once it has spent at least 1,500 EGP and taken at least 5 purchases inside the 30 days. It is a WINNER only if its ROAS is at least 19% above the account average — the account ran 3.71x over those 30 days, so the winner bar is 4.45x. Beating the account by 1% is not a winner, it is a rounding error, and 1 ad(s) landed in exactly that gap this month. Catalogue and DPA are excluded from both sides: a product feed is not a creative you shot.

⚠️

At a 10% hit rate you must launch 10 new creatives for the next winner and 30 for three. You launched 142 in the last 30 days.

Winners are the 12 creative ads that beat the account's 3.92x over the last 7 days on at least 3 purchases. Losers are the 18 that did not. No catalogue on either side.

✎

The brief · give this to the editor

✓

Brief 3 new videos off all products retention. It is the highest revenue ad that beats the account (5.68x vs 3.92x).

✓

The CTA is earning the click: winners run 4.13% outbound CTR against 3.63% on the losers. Reuse the same offer wording.

✓

Winners convert 1.16% of clicks, losers 0.63%. Send the new cuts to the same landing page.

✓

Change the body, the angle and the opening line. Do not re-upload the same video with a new name, Meta will treat it as the same creative and it will fatigue on the same curve.

General observations

The account in plain sentences, with the money attached to each one.

General observations

what a media buyer would say out loud after reading the rest

The move was the BUDGET. Revenue +11.9k EGP: +34.8k of it is the budget you set, -22.9k is the account itself. Efficiency got worse (ROAS 4.36x to 4.01x).

1 ad is fatigued or saturated and it is carrying 2,593 EGP a day. The worst is all products retention at frequency 9.31. Refresh the creative or the audience; more budget on a saturated ad buys repeats, not customers.

Biggest opportunity: MTG Scaling. It returns 6.75x against the account's 3.92x at frequency 1.73. Take it from 859 to 1,030 a day: that is 172 more spend for about 1,159 more revenue a day.

Biggest leak: nesma the mommy eats strollers. 1.72x against the account's 3.92x. Cutting it frees 771 a day; redeployed at the account rate that is +1,696 a day net.

The money is in the wrong audience. New audience returns 6.51x but only takes 37% of spend, while Existing customers returns 4.36x on 24% of it. Move budget from the second to the first.

Creative supply. You launched 142 ads in 30 days, 10 got enough data to judge, 1 beat the account. That is a 10% hit rate, so the next winner costs about 10 launches. Anything less than that is not a creative plan.

Margin and LTV are unknown from ad data. Nothing above assumes them.
