An ad must pass EVERY line of a label to get it. SATURATED needs 3 of 4 plus frequency over 4.0. CATALOGUE and DPA are never counted as creative winners.

The budget — on the ad sets

Budgets move on ad sets. Every ad set ranked against the account, above and below.

 The budget board, per day

ad set level, because that is where the budget field is

The figure consists of three cards with a light blue background and rounded corners. Each card has a title, a large numerical value, and a smaller explanatory text below it.

- Card 1:** Title "BUDGET TO ADD" with a green upward arrow icon. Value "+740 / day". Text "Previous: across 4 ad sets".
- Card 2:** Title "BUDGET TO FREE" with a blue downward arrow icon. Value "-1,000 / day". Text "Previous: across 1 ad sets".
- Card 3:** Title "ACCOUNT ROAS" with a purple line graph icon. Value "4.86x". Text "Previous: the bar every ad set is judged against".

The ads — keep or kill

An ad has no budget field. It gets kept, refreshed, or switched off.

Good ads — keep them running

the big number is last 7 days. the small one under it is the 7 day benchmark. the VERDICT is always a 7 day call — one day never kills an ad

Read the two together. A red weekly Δ with a NORMAL today is a real slide. A green week with a BELOW BAND today is one bad day, not a dying ad, and killing it would be a mistake.

The five fatigue tests · this is the whole rulebook

1. frequency over 3.0	the same people are seeing it again
2. outbound CTR down over 15%	they are reacting to it less than they did
3. CPM up over 15%	the auction is charging more to keep showing it
4. hook rate down over 15%	the first 3 seconds stopped stopping them
5. CPP up over 20%	each purchase now costs more than it did

= 3 or more of the five fire and FATIGUED frequency is over 3.0, OR frequency is over 4.0 with 2 firing.

= frequency over 4.0 on its own: the same people are seeing it again whatever else is true.

= 2 FATIGUING fire.

= 1 or none. A catalogue ad has no hook, so only four of the five can ever fire on it.

🔍

THE CRITERIA, IN FULL. An ad is JUDGED once it has spent at least 1,500 EGP and taken at least 5 purchases inside the 30 days. It is a WINNER only if its ROAS is at least 19% above the account average — the account ran 3.73x over those 30 days, so the winner bar is 4.48x. Beating the account by 1% is not a winner, it is a rounding error, and 4 ad(s) landed in exactly that gap this month. Catalogue and DPA are excluded from both sides: a product feed is not a creative you shot.

⚠️

At a 19% hit rate you must launch 6 new creatives for the next winner and 16 for three. You launched 156 in the last 30 days.

Winners are the 10 creative ads that beat the account's 4.86x over the last 7 days on at least 3 purchases. Losers are the 12 that did not. No catalogue on either side.

✎

The brief · give this to the editor

✓

Brief 3 new videos off all products retention. It is the highest revenue ad that beats the account (9.10x vs 4.86x).

✓

The CTA is earning the click: winners run 4.41% outbound CTR against 2.35% on the losers. Reuse the same offer wording.

✓

Winners convert 1.41% of clicks, losers 0.83%. Send the new cuts to the same landing page.

✓

Change the body, the angle and the opening line. Do not re-upload the same video with a new name, Meta will treat it as the same creative and it will fatigue on the same curve.

General observations

The account in plain sentences, with the money attached to each one.

General observations

what a media buyer would say out loud after reading the rest

The move was **REAL PERFORMANCE**. Revenue +80.9k EGP: -69.5k of it is the budget you set, +150.4k is the account itself. Efficiency improved (ROAS 3.88x to 4.86x).

2 ads are fatigued or saturated and they are carrying 2,940 EGP a day. The worst is **REMARKETING VC OR ATC 30d** at frequency 3.37. Refresh the creative or the audience; more budget on a saturated ad buys repeats, not customers.

Biggest opportunity: Scaling **iwear marwa**. It returns 7.54x against the account's 4.86x at frequency 1.38. Take it from 354 to 425 a day: that is 71 more spend for about 534 more revenue a day.

The money is in the wrong audience. Existing customers returns 7.42x but only takes 20% of spend, while New audience returns 4.23x on 43% of it. Move budget from the second to the first.

Creative supply. You launched 156 ads in 30 days, 16 got enough data to judge, 3 beat the account. That is a 19% hit rate, so the next winner costs about 6 launches. Anything less than that is not a creative plan.

Margin and LTV are unknown from ad data. Nothing above assumes them.
