Read the two together. A red weekly Δ with a NORMAL today is a real slide. A green week with a BELOW BAND today is one bad day, not a dying ad, and killing it would be a mistake.

The five fatigue tests · this is the whole rulebook

1. frequency over 3.0	the same people are seeing it again
2. outbound CTR down over 15%	they are reacting to it less than they did
3. CPM up over 15%	the auction is charging more to keep showing it
4. hook rate down over 15%	the first 3 seconds stopped stopping them
5. CPP up over 20%	each purchase now costs more than it did

= 3 or more of the five fire and FATIGUED frequency is over 3.0, OR frequency is over 4.0 with 2 firing.

= frequency over 4.0 on its own: the same people are seeing it again whatever else is true.

= 2 fire. FATIGUING

= 1 or none. A catalogue ad has no hook, so only four of the five can ever fire on it.

✎

The brief · give this to the editor

✓

Brief 3 new videos off Scaling baby outfits. It is the highest revenue ad that beats the account (5.60x vs 2.55x).

✓

Keep the first 3 seconds. Winners hook 16.3% of impressions, the losers hook 9.3%. That gap is the whole difference, everything after it is downstream.

✓

The CTA is earning the click: winners run 3.60% outbound CTR against 2.10% on the losers. Reuse the same offer wording.

✓

Winners convert 2.01% of clicks, losers 1.25%. Send the new cuts to the same landing page.

✓

Change the body, the angle and the opening line. Do not re-upload the same video with a new name, Meta will treat it as the same creative and it will fatigue on the same curve.

General observations

The account in plain sentences, with the money attached to each one.

General observations

what a media buyer would say out loud after reading the rest

The move was the BUDGET. Revenue -13.4k EGP: -11.3k of it is the budget you set, -2,100 is the account itself. Efficiency got worse (ROAS 2.62x to 2.46x).

No ad is fatigued or saturated. Nothing in the account is being shown to the same people over and over, so frequency is not what is holding you back.

Biggest opportunity: Scaling baby outfits. It returns 5.60x against the account's 2.55x at frequency 1.53. Take it from 583 to 670 a day: that is 87 more spend for about 489 more revenue a day.

The money is in the wrong audience. New audience returns 3.57x but only takes 57% of spend, while Existing customers returns 0.00x on 5% of it. Move budget from the second to the first.

Margin and LTV are unknown from ad data. Nothing above assumes them.
