## The five fatigue tests · this is the whole rulebook

|                               |                                                 |
|-------------------------------|-------------------------------------------------|
| 1. frequency over 3.0         | the same people are seeing it again             |
| 2. outbound CTR down over 15% | they are reacting to it less than they did      |
| 3. CPM up over 15%            | the auction is charging more to keep showing it |
| 4. hook rate down over 15%    | the first 3 seconds stopped stopping them       |
| 5. CPP up over 20%            | each purchase now costs more than it did        |

= 3 or more of the five fire and FATIGUED frequency is over 3.0, OR frequency is over 4.0 with 2 firing. SATURATED = frequency over 4.0 on its own: the same people are seeing it again whatever else is true. = 2 fire. FATIGUING = 1 or none. A catalogue ad has no hook, so only four of the five can ever fire on it. FRESH

📌 Winners are the 1 creative ads that beat the account's 2.62x over the last 7 days on at least 3 purchases. Losers are the 1 that did not. No catalogue on either side.

✎

## The brief · give this to the editor

- ✓ Brief 3 new videos off Scaling baby outfits. It is the highest revenue ad that beats the account (4.99x vs 2.62x).
- ✓ Keep the first 3 seconds. Winners hook 17.4% of impressions, the losers hook 10.2%. That gap is the whole difference, everything after it is downstream.
- ✓ The CTA is earning the click: winners run 3.78% outbound CTR against 2.15% on the losers. Reuse the same offer wording.
- ✓ Change the body, the angle and the opening line. Do not re-upload the same video with a new name, Meta will treat it as the same creative and it will fatigue on the same curve.

# General observations

The account in plain sentences, with the money attached to each one.

## General observations

what a media buyer would say out loud after reading the rest

**The move was REAL PERFORMANCE. Revenue -6,570 EGP: +187 of it is the budget you set, -6,757 is the account itself. Efficiency got worse (ROAS 2.75x to 0.70x).**

**No ad is fatigued or saturated. Nothing in the account is being shown to the same people over and over, so frequency is not what is holding you back.**

**Biggest opportunity: Big personality catalogue 06-28. It returns 3.57x against the account's 2.62x at frequency 2.13. Take it from 661 to 793 a day: that is 132 more spend for about 472 more revenue a day.**

**The money is in the wrong audience. Engaged returns 1.58x but only takes 30% of spend, while Existing customers returns 0.00x on 7% of it. Move budget from the second to the first.**

**Margin and LTV are unknown from ad data. Nothing above assumes them.**

Daily memo. Yesterday vs the day before. One day is noisy, treat it as a signal, not a verdict.

Audience is Meta's own breakdown by audience segment.
