Read the two together. A red weekly Δ with a NORMAL today is a real slide. A green week with a BELOW BAND today is one bad day, not a dying ad, and killing it would be a mistake.

The five fatigue tests · this is the whole rulebook

1. frequency over 3.0	the same people are seeing it again
2. outbound CTR down over 15%	they are reacting to it less than they did
3. CPM up over 15%	the auction is charging more to keep showing it
4. hook rate down over 15%	the first 3 seconds stopped stopping them
5. CPP up over 20%	each purchase now costs more than it did

= 3 or more of the five fire and FATIGUED frequency is over 3.0, OR frequency is over 4.0 with 2 firing.

= frequency over 4.0 on its own: the same people are seeing it again whatever else is true.

= 2 fire. FATIGUING

= 1 or none. A catalogue ad has no hook, so only four of the five can ever fire on it.

THE CRITERIA, IN FULL. An ad is JUDGED once it has spent at least 1,500 EGP and taken at least 5 purchases inside the 30 days. It is a WINNER only if its ROAS is at least 19% above the account average — the account ran 5.09x over those 30 days, so the winner bar is 6.11x. Beating the account by 1% is not a winner, it is a rounding error, and 3 ad(s) landed in exactly that gap this month. Catalogue and DPA are excluded from both sides: a product feed is not a creative you shot.

At a 9% hit rate you must launch 11 new creatives for the next winner and 33 for three. You launched 188 in the last 30 days.

The winning creatives — last 30 days, by name

Winners are the 24 creative ads that beat the account's 4.09x over the last 7 days on at least 3 purchases. Losers are the 38 that did not. No catalogue on either side.

The brief · give this to the editor

- Brief 3 new videos off all products retention. It is the highest revenue ad that beats the account (15.28x vs 4.09x).
- The CTA is earning the click: winners run 4.37% outbound CTR against 3.96% on the losers. Reuse the same offer wording.
- Winners convert 1.10% of clicks, losers 0.53%. Send the new cuts to the same landing page.
- Change the body, the angle and the opening line. Do not re-upload the same video with a new name, Meta will treat it as the same creative and it will fatigue on the same curve.

FATIGUED = 3+ of the five tests fire and frequency is over 3.0, or frequency is over 4.0 with 2 firing. SATURATED = frequency over 4.0 on its own. FATIGUING = 2 fire.

General observations

The account in plain sentences, with the money attached to each one.

General observations

what a media buyer would say out loud after reading the rest

The move was the BUDGET. Revenue -92.6k EGP: -49.6k of it is the budget you set, -43.0k is the account itself. Efficiency got worse (ROAS 5.24x to 4.53x).

1 ad is fatigued or saturated and it is carrying 2,923 EGP a day. The worst is all products retention at frequency 11.25. Refresh the creative or the audience; more budget on a saturated ad buys repeats, not customers.

Biggest opportunity: scaling pw inside scaling sistema lunch.... It returns 6.15x against the account's 4.09x at frequency 1.56. Take it from 1,225 to 1,470 a day: that is 245 more spend for about 1,507 more revenue a day.

Biggest leak: lblb strollers v2. 0.59x against the account's 4.09x. Cutting it frees 1,561 a day; redeployed at the account rate that is +5,465 a day net.

The money is in the wrong audience. Existing customers returns 15.84x but only takes 6% of spend, while New audience returns 4.37x on 37% of it. Move budget from the second to the first.

Creative supply. You launched 188 ads in 30 days, 44 got enough data to judge, 4 beat the account. That is a 9% hit rate, so the next winner costs about 11 launches. Anything less than that is not a creative plan.

Margin and LTV are unknown from ad data. Nothing above assumes them.

Daily memo. Yesterday vs the day before. One day is noisy, treat it as a signal, not a verdict.

Audience is Meta's own breakdown by audience segment.
