The ads — keep or kill

An ad has no budget field. It gets kept, refreshed, or switched off.

Good ads — keep them running

the big number is yesterday. the small one under it is the 7 day benchmark. the VERDICT is always a 7 day call — one day never kills an ad

Read the two together. A red weekly Δ with a NORMAL today is a real slide. A green week with a BELOW BAND today is one bad day, not a dying ad, and killing it would be a mistake.

The five fatigue tests · this is the whole rulebook

1. frequency over 3.0	the same people are seeing it again
2. outbound CTR down over 15%	they are reacting to it less than they did
3. CPM up over 15%	the auction is charging more to keep showing it
4. hook rate down over 15%	the first 3 seconds stopped stopping them
5. CPP up over 20%	each purchase now costs more than it did

= 3 or more of the five fire and FATIGUED frequency is over 3.0, OR frequency is over 4.0 with 2 firing. SATURATED = frequency over 4.0 on its own: the same people are seeing it again whatever else is true. = 2 fire. FATIGUING = 1 or none. A catalogue ad has no hook, so only four of the five can ever fire on it.

✎

The brief · give this to the editor

- ✓ Brief 3 new videos off Scaling baby outfits. It is the highest revenue ad that beats the account (6.09x vs 2.71x).
- ✓ Hold the middle. Winners keep 37% of the 3 second viewers to a thruplay, losers keep 33%. Cut the setup, get to the product faster.
- ✓ Winners convert 1.78% of clicks, losers 1.21%. Send the new cuts to the same landing page.
- ✓ Change the body, the angle and the opening line. Do not re-upload the same video with a new name, Meta will treat it as the same creative and it will fatigue on the same curve.

General observations

The account in plain sentences, with the money attached to each one.

General observations

what a media buyer would say out loud after reading the rest

The move was **REAL PERFORMANCE**. Revenue +10.8k EGP: -404 of it is the budget you set, +11.2k is the account itself. Efficiency improved (ROAS 0.24x to 4.66x).

No ad is fatigued or saturated. Nothing in the account is being shown to the same people over and over, so frequency is not what is holding you back.

Biggest opportunity: Scaling baby outfits. It returns 6.09x against the account's 2.71x at frequency 1.54. Take it from 536 to 616 a day: that is 80 more spend for about 490 more revenue a day.

The money is in the wrong audience. Existing customers returns 32.99x but only takes 6% of spend, while New audience returns 1.08x on 57% of it. Move budget from the second to the first.

Margin and LTV are unknown from ad data. Nothing above assumes them.

Daily memo. Yesterday vs the day before. One day is noisy, treat it as a signal, not a verdict.
