The budget – on the ad sets

Budgets move on ad sets. Every ad set ranked against the account, above and below.

The budget board, per day

ad set level, because that is where the budget field is

The figure consists of three cards, each with a colored background and a title. The first card is light green and shows 'BUDGET TO ADD' with an upward arrow icon, a value of '+299 / day', and a note 'Previous: across 2 ad sets'. The second card is light blue and shows 'BUDGET TO FREE' with a downward arrow icon, a value of '-2,000 / day', and a note 'Previous: across 1 ad sets'. The third card is light purple and shows 'ACCOUNT ROAS' with a line graph icon, a value of '4.19x', and a note 'Previous: the bar every ad set is judged against'.

Read the two together. A red weekly Δ with a NORMAL today is a real slide. A green week with a BELOW BAND today is one bad day, not a dying ad, and killing it would be a mistake.

The five fatigue tests · this is the whole rulebook

1. frequency over 3.0	the same people are seeing it again
2. outbound CTR down over 15%	they are reacting to it less than they did
3. CPM up over 15%	the auction is charging more to keep showing it
4. hook rate down over 15%	the first 3 seconds stopped stopping them
5. CPP up over 20%	each purchase now costs more than it did

= 3 or more of the five fire and FATIGUED frequency is over 3.0, OR frequency is over 4.0 with 2 firing.

= frequency over 4.0 on its own: the same people are seeing it again whatever else is true.

= 2 fire. FATIGUING

= 1 or none. A catalogue ad has no hook, so only four of the five can ever fire on it.

📄

THE CRITERIA, IN FULL. An ad is JUDGED once it has spent at least 1,500 EGP and taken at least 5 purchases inside the 30 days. It is a WINNER only if its ROAS is at least 19% above the account average — the account ran 3.49x over those 30 days, so the winner bar is 4.19x. Beating the account by 1% is not a winner, it is a rounding error, and 0 ad(s) landed in exactly that gap this month. Catalogue and DPA are excluded from both sides: a product feed is not a creative you shot.

⚠️

At a 90% hit rate you must launch 2 new creatives for the next winner and 4 for three. You launched 32 in the last 30 days.

General observations

The account in plain sentences, with the money attached to each one.

General observations

what a media buyer would say out loud after reading the rest

The move was REAL PERFORMANCE. Revenue -7,807 EGP: +4,619 of it is the budget you set, -12.4k is the account itself. Efficiency got worse (ROAS 4.77x to 3.64x).

No ad is fatigued or saturated. Nothing in the account is being shown to the same people over and over, so frequency is not what is holding you back.

Biggest opportunity: Playmore video + catalogue from all aud.... It returns 12.45x against the account's 4.19x at frequency 2.40. Take it from 348 to 417 a day: that is 70 more spend for about 866 more revenue a day.

The money is in the wrong audience. New audience returns 3.97x but only takes 66% of spend, while Existing customers returns 2.49x on 7% of it. Move budget from the second to the first.

Creative supply. You launched 32 ads in 30 days, 2 got enough data to judge, 2 beat the account. That is a 90% hit rate, so the next winner costs about 2 launches. Anything less than that is not a creative plan.

Margin and LTV are unknown from ad data. Nothing above assumes them.
