Read the two together. A red weekly Δ with a NORMAL today is a real slide. A green week with a BELOW BAND today is one bad day, not a dying ad, and killing it would be a mistake.

The five fatigue tests · this is the whole rulebook

1. frequency over 3.0	the same people are seeing it again
2. outbound CTR down over 15%	they are reacting to it less than they did
3. CPM up over 15%	the auction is charging more to keep showing it
4. hook rate down over 15%	the first 3 seconds stopped stopping them
5. CPP up over 20%	each purchase now costs more than it did

= 3 or more of the five fire and FATIGUED frequency is over 3.0, OR frequency is over 4.0 with 2 firing.

= frequency over 4.0 on its own: the same people are seeing it again whatever else is true.

= 2 fire. FATIGUING

= 1 or none. A catalogue ad has no hook, so only four of the five can ever fire on it.

 **THE CRITERIA, IN FULL.** An ad is **JUDGED** once it has spent at least 1,500 EGP and taken at least 5 purchases inside the 30 days. It is a **WINNER** only if its ROAS is at least 19% above the account average — the account ran 6.55x over those 30 days, so the winner bar is 7.86x. Beating the account by 1% is not a winner, it is a rounding error, and 2 ad(s) landed in exactly that gap this month. Catalogue and DPA are excluded from both sides: a product feed is not a creative you shot.

 **At a 17% hit rate you must launch 6 new creatives for the next winner and 18 for three. You launched 343 in the last 30 days.**

 **Winners are the 16 creative ads that beat the account's 5.81x over the last 7 days on at least 3 purchases. Losers are the 38 that did not. No catalogue on either side.**

The brief · give this to the editor

-  Brief 3 new videos off all products retention. It is the highest revenue ad that beats the account (14.51x vs 5.81x).
-  The CTA is earning the click: winners run 4.84% outbound CTR against 4.28% on the losers. Reuse the same offer wording.
-  Winners convert 1.56% of clicks, losers 0.56%. Send the new cuts to the same landing page.
-  Change the body, the angle and the opening line. Do not re-upload the same video with a new name, Meta will treat it as the same creative and it will fatigue on the same curve.

General observations

The account in plain sentences, with the money attached to each one.

 General observations

what a media buyer would say out loud after reading the rest

The move was **REAL PERFORMANCE**. Revenue -265.5k EGP: +122.6k of it is the budget you set, -388.1k is the account itself. Efficiency got worse (ROAS 9.46x to 4.12x).

1 ad is **fatigued or saturated** and it is carrying 1,851 EGP a day. The worst is all products retention at frequency 8.12. Refresh the creative or the audience; more budget on a saturated ad buys repeats, not customers.

Biggest opportunity: lblb summer MOA one take. It returns 151.28x against the account's 5.81x at frequency 1.27. Take it from 70 to 81 a day: that is 11 more spend for about 1,591 more revenue a day.

Biggest leak: PWF backtoschool s26. 1.51x against the account's 5.81x. Cutting it frees 1,583 a day; redeployed at the account rate that is +6,809 a day net.

The money is in the **wrong audience**. Existing customers returns 20.37x but only takes 4% of spend, while Engaged returns 4.46x on 49% of it. Move budget from the second to the first.

Creative supply. You launched 343 ads in 30 days, 42 got enough data to judge, 7 beat the account. That is a 17% hit rate, so the next winner costs about 6 launches. Anything less than that is not a creative plan.

 **Margin and LTV are unknown from ad data. Nothing above assumes them.**
