Previous: launch 50 to get 1 · 150 to get 3

 **THE CRITERIA, IN FULL.** An ad is **JUDGED** once it has spent at least 1,500 EGP and taken at least 5 purchases inside the 30 days. It is a **WINNER** only if its ROAS is at least 19% above the account average — the account ran 3.51x over those 30 days, so the winner bar is 4.21x. Beating the account by 1% is not a winner, it is a rounding error, and 0 ad(s) landed in exactly that gap this month. Catalogue and DPA are excluded from both sides: a product feed is not a creative you shot.

 **At a 2% hit rate you must launch 50 new creatives for the next winner and 150 for three. You launched 21 in the last 30 days.**

General observations

The account in plain sentences, with the money attached to each one.

General observations

what a media buyer would say out loud after reading the rest

No ad is fatigued or saturated. Nothing in the account is being shown to the same people over and over, so frequency is not what is holding you back.

Creative supply. You launched 21 ads in 30 days, 1 got enough data to judge, 0 beat the account. That is a 2% hit rate, so the next winner costs about 50 launches. Anything less than that is not a creative plan.

Margin and LTV are unknown from ad data. Nothing above assumes them.
