You cut the budget. Revenue fell 8,334 EGP, and 8,167 of that is purely the money, not the account getting worse. Efficiency got worse (ROAS 3.97x to 0.00x).

Read the two together. A red weekly Δ with a NORMAL today is a real slide. A green week with a BELOW BAND today is one bad day, not a dying ad, and killing it would be a mistake.

The five fatigue tests · this is the whole rulebook

1. frequency over 3.0	the same people are seeing it again
2. outbound CTR down over 15%	they are reacting to it less than they did
3. CPM up over 15%	the auction is charging more to keep showing it
4. hook rate down over 15%	the first 3 seconds stopped stopping them
5. CPP up over 20%	each purchase now costs more than it did

= 3 or more of the five fire and FATIGUED frequency is over 3.0, OR frequency is over 4.0 with 2 firing. SATURATED = frequency over 4.0 on its own: the same people are seeing it again whatever else is true. = 2 FATIGUING fire. FRESH = 1 or none. A catalogue ad has no hook, so only four of the five can ever fire on it.

General observations

The account in plain sentences, with the money attached to each one.

General observations

what a media buyer would say out loud after reading the rest

The move was the BUDGET. Revenue -8,334 EGP: -8,167 of it is the budget you set, -167 is the account itself. Efficiency got worse (ROAS 3.97x to 0.00x).

No ad is fatigued or saturated. Nothing in the account is being shown to the same people over and over, so frequency is not what is holding you back.

Biggest opportunity: Big personality catalogue 06-28. It returns 3.72x against the account's 2.00x at frequency 2.08. Take it from 581 to 698 a day: that is 116 more spend for about 433 more revenue a day.

The money is in the wrong audience. New audience returns 0.00x but only takes 40% of spend, while New audience returns 0.00x on 40% of it. Move budget from the second to the first.

Margin and LTV are unknown from ad data. Nothing above assumes them.

Daily memo. Yesterday vs the day before. One day is noisy, treat it as a signal, not a verdict.

Audience is Meta's own breakdown by audience segment.
