# The ads — keep or kill

An ad has no budget field. It gets kept, refreshed, or switched off.

☆

Good ads — keep them running

the big number is yesterday. the small one under it is the 7 day benchmark. the VERDICT is always a 7 day call — one day never kills an ad

Read the two together. A red weekly Δ with a NORMAL today is a real slide. A green week with a BELOW BAND today is one bad day, not a dying ad, and killing it would be a mistake.

The five fatigue tests · this is the whole rulebook

|                               |                                                 |
|-------------------------------|-------------------------------------------------|
| 1. frequency over 3.0         | the same people are seeing it again             |
| 2. outbound CTR down over 15% | they are reacting to it less than they did      |
| 3. CPM up over 15%            | the auction is charging more to keep showing it |
| 4. hook rate down over 15%    | the first 3 seconds stopped stopping them       |
| 5. CPP up over 20%            | each purchase now costs more than it did        |

= 3 or more of the five fire and FATIGUED frequency is over 3.0, OR frequency is over 4.0 with 2 firing.

= frequency over 4.0 on its own: the same people are seeing it again whatever else is true.

= 2 fire. FATIGUING

= 1 or none. A catalogue ad has no hook, so only four of the five can ever fire on it.

THE CRITERIA, IN FULL. An ad is JUDGED once it has spent at least 1,500 EGP and taken at least 5 purchases inside the 30 days. It is a WINNER only if its ROAS is at least 19% above the account average — the account ran 3.91x over those 30 days, so the winner bar is 4.69x. Beating the account by 1% is not a winner, it is a rounding error, and 2 ad(s) landed in exactly that gap this month. Catalogue and DPA are excluded from both sides: a product feed is not a creative you shot.

At a 25% hit rate you must launch 4 new creatives for the next winner and 12 for three. You launched 116 in the last 30 days.

Winners are the 3 creative ads that beat the account's 4.15x over the last 7 days on at least 3 purchases. Losers are the 4 that did not. No catalogue on either side.

## The brief · give this to the editor

- Brief 3 new videos off BABY BOY OUTFITS. It is the highest revenue ad that beats the account (6.94x vs 4.15x).
- The CTA is earning the click: winners run 3.31% outbound CTR against 2.21% on the losers. Reuse the same offer wording.
- Winners convert 4.00% of clicks, losers 1.95%. Send the new cuts to the same landing page.
- Change the body, the angle and the opening line. Do not re-upload the same video with a new name, Meta will treat it as the same creative and it will fatigue on the same curve.

# General observations

The account in plain sentences, with the money attached to each one.

## General observations

what a media buyer would say out loud after reading the rest

The move was **REAL PERFORMANCE**. Revenue +9,876 EGP: +419 of it is the budget you set, +9,457 is the account itself. Efficiency improved (ROAS 3.81x to 5.33x).

No ad is fatigued or saturated. Nothing in the account is being shown to the same people over and over, so frequency is not what is holding you back.

Biggest opportunity: **BABY BOY OUTFITS**. It returns 6.94x against the account's 4.15x at frequency 1.82. Take it from 989 to 1,186 a day: that is 198 more spend for about 1,372 more revenue a day.

The money is in the wrong audience. Engaged returns 7.10x but only takes 20% of spend, while New audience returns 4.84x on 73% of it. Move budget from the second to the first.

Creative supply. You launched 116 ads in 30 days, 8 got enough data to judge, 2 beat the account. That is a 25% hit rate, so the next winner costs about 4 launches. Anything less than that is not a creative plan.

Margin and LTV are unknown from ad data. Nothing above assumes them.

Daily memo. Yesterday vs the day before. One day is noisy, treat it as a signal, not a verdict.

Audience is Meta's own breakdown by audience segment.
