These beat the account's 2.91x. Raise the budget on the ones with frequency headroom; the ones already fatiguing need fresh creative, not more money.

Daily memo. Yesterday vs the day before. One day is noisy, treat it as a signal, not a verdict.

Audience is Meta's own breakdown by audience segment.

The ads — keep or kill

An ad has no budget field. It gets kept, refreshed, or switched off.

Good ads — keep them running

the big number is yesterday. the small one under it is the 7 day benchmark. the VERDICT is always a 7 day call — one day never kills an ad

Read the two together. A red weekly Δ with a NORMAL today is a real slide. A green week with a BELOW BAND today is one bad day, not a dying ad, and killing it would be a mistake.

The five fatigue tests · this is the whole rulebook

1. frequency over 3.0	the same people are seeing it again
2. outbound CTR down over 15%	they are reacting to it less than they did
3. CPM up over 15%	the auction is charging more to keep showing it
4. hook rate down over 15%	the first 3 seconds stopped stopping them
5. CPP up over 20%	each purchase now costs more than it did

= 3 or more of the five fire and FATIGUED frequency is over 3.0, OR frequency is over 4.0 with 2 firing.

= frequency over 4.0 on its own: the same people are seeing it again whatever else is true.

= 2 fire. FATIGUING

= 1 or none. A catalogue ad has no hook, so only four of the five can ever fire on it.

📌

Winners are the 2 creative ads that beat the account's 2.91x over the last 7 days on at least 3 purchases. Losers are the 1 that did not. No catalogue on either side.

✎

The brief · give this to the editor

- ✓

Brief 3 new videos off Scaling baby outfits. It is the highest revenue ad that beats the account (6.37x vs 2.91x).
- ✓

Keep the first 3 seconds. Winners hook 18.0% of impressions, the losers hook 9.8%. That gap is the whole difference, everything after it is downstream.
- ✓

The CTA is earning the click: winners run 3.49% outbound CTR against 2.27% on the losers. Reuse the same offer wording.
- ✓

Change the body, the angle and the opening line. Do not re-upload the same video with a new name, Meta will treat it as the same creative and it will fatigue on the same curve.

General observations

The account in plain sentences, with the money attached to each one.

General observations

what a media buyer would say out loud after reading the rest

No ad is fatigued or saturated. Nothing in the account is being shown to the same people over and over, so frequency is not what is holding you back.

Biggest opportunity: Scaling baby outfits. It returns 6.37x against the account's 2.91x at frequency 1.56. Take it from 512 to 614 a day: that is 102 more spend for about 652 more revenue a day.

The money is in the wrong audience. Existing customers returns 15.01x but only takes 8% of spend, while New audience returns 1.07x on 58% of it. Move budget from the second to the first.

Margin and LTV are unknown from ad data. Nothing above assumes them.

Daily memo. Yesterday vs the day before. One day is noisy, treat it as a signal, not a verdict.

Audience is Meta's own breakdown by audience segment.
