## The criteria · this is the whole rulebook

☰ SCALE

- ROAS above the account
- CPP below the account
- frequency under 2.5
- at least 5 purchases
- spend over 1,500

☰ HEADROOM

- ROAS above the account
- frequency under 2.0
- CPP stable or better
- no decline in the last 7 days

☰ SATURATED

- frequency over 4.0
- outbound CTR falling
- CPM rising
- CPP rising

☰ CUT

- ROAS below 60% of the account
- CPP above the account
- at least 5 purchases of evidence

An ad must pass EVERY line of a label to get it. SATURATED needs 3 of 4 plus frequency over 4.0. CATALOGUE and DPA are never counted as creative winners.

# The ads — keep or kill

An ad has no budget field. It gets kept, refreshed, or switched off.

## Bad ads — switch them off

the big number is yesterday. the small one under it is the 7 day benchmark. the VERDICT is always a 7 day call — one day never kills an ad

Read the two together. A red weekly Δ with a NORMAL today is a real slide. A green week with a BELOW BAND today is one bad day, not a dying ad, and killing it would be a mistake.

The five fatigue tests · this is the whole rulebook

|                               |                                                 |
|-------------------------------|-------------------------------------------------|
| 1. frequency over 3.0         | the same people are seeing it again             |
| 2. outbound CTR down over 15% | they are reacting to it less than they did      |
| 3. CPM up over 15%            | the auction is charging more to keep showing it |
| 4. hook rate down over 15%    | the first 3 seconds stopped stopping them       |
| 5. CPP up over 20%            | each purchase now costs more than it did        |

= 3 or more of the five fire and FATIGUED frequency is over 3.0, OR frequency is over 4.0 with 2 firing.

= frequency over 4.0 on its own: the same people are seeing it again whatever else is true.

= 2 fire. FATIGUING

= 1 or none. A catalogue ad has no hook, so only four of the five can ever fire on it.

📖

THE CRITERIA, IN FULL. An ad is JUDGED once it has spent at least 1,500 EGP and taken at least 5 purchases inside the 30 days. It is a WINNER only if its ROAS is at least 19% above the account average — the account ran 3.36x over those 30 days, so the winner bar is 4.03x. Beating the account by 1% is not a winner, it is a rounding error, and 0 ad(s) landed in exactly that gap this month. Catalogue and DPA are excluded from both sides: a product feed is not a creative you shot.

⚠️

At a 90% hit rate you must launch 2 new creatives for the next winner and 4 for three. You launched 33 in the last 30 days.

Winners are the 2 creative ads that beat the account's 4.91x over the last 7 days on at least 3 purchases. Losers are the 2 that did not. No catalogue on either side.

✎

The brief · give this to the editor

✓

Brief 3 new videos off FLASHSALE OUTFIRS. It is the highest revenue ad that beats the account (4.97x vs 4.91x).

✓

Hold the middle. Winners keep 30% of the 3 second viewers to a thruplay, losers keep 17%. Cut the setup, get to the product faster.

✓

Winners convert 2.23% of clicks, losers 1.64%. Send the new cuts to the same landing page.

✓

Change the body, the angle and the opening line. Do not re-upload the same video with a new name, Meta will treat it as the same creative and it will fatigue on the same curve.

Daily memo. Yesterday vs the day before. One day is noisy, treat it as a signal, not a verdict.

👥

Audience is Meta's own breakdown by audience segment.

# General observations

The account in plain sentences, with the money attached to each one.

## General observations

what a media buyer would say out loud after reading the rest

❶ The move was **REAL PERFORMANCE**. Revenue -933 EGP: +220 of it is the budget you set, -1,153 is the account itself. Efficiency got worse (ROAS 2.93x to 2.54x).

✓ No ad is fatigued or saturated. Nothing in the account is being shown to the same people over and over, so frequency is not what is holding you back.

↓ Biggest leak: Big personality catalogue 06-28. 2.33x against the account's 4.91x. Cutting it frees 602 a day; redeployed at the account rate that is +1,554 a day net.

⚖ The money is in the wrong audience. New audience returns 2.80x but only takes 67% of spend, while Existing customers returns 0.00x on 6% of it. Move budget from the second to the first.

☆ Creative supply. You launched 33 ads in 30 days, 2 got enough data to judge, 2 beat the account. That is a 90% hit rate, so the next winner costs about 2 launches. Anything less than that is not a creative plan.

❶ Margin and LTV are unknown from ad data. Nothing above assumes them.
